After one tap on the button that calls `add()`, what does `n` show?

```
const [n, setN] = useState(0)
```

```
const add = () => {  
  setN(n + 1)  
  setN(n + 1)  
}
```

Weeks 7-8

DSA: trees and DP

Gap: DSA

Reassess at week 8. See how far your score moved.

TypeScript Fundamentals

Closes gap: TypeScript

Beginner → Intermediate

About 10 hrs

Why this matters

Companies hiring full stack developers expect typed code. Your assessment showed solid JavaScript, but shaky ground on types, generics and how they prevent bugs before the code runs. Closing this gap is the quickest way to lift your match score.

Lessons

1 of 3 done

 **Types and interfaces**
Completed

 **Generics**
Up next · 25 min

 **Utility types**
Unlocks after Generics

Learn from

 **Generics explained with examples** >

 **Utility types by example** >
Article · 8 min read

Practice

1 of 3 done

☒ **Type a small API response**

☐ **Convert 3 JavaScript functions to TypeScript**

☐ **Mini-project: a typed API client**
Push it to a GitHub repo and we'll review it for your project score.

 **Mini-assessment**
10 questions. Pass at 70% to unlock Module 2.

Continue: Generics →
